MEMBERSHIP INFORMATION KIT 2018/19

*"To be the peak industry body
and an acknowledged authority
within the timber industry in NSW."*

ABOUT TIMBER NSW

HISTORY

In 1906 the Association of Country Saw Millers, formally established an organisation to serve the domestic NSW sawmilling industry in a wide range of matters. During its 110 long year history, the Association has assumed a varying role, depending on the particular economic and political climate of the day.

It changed its name to NSW Forest Products Association in 1980.

In October 2014 the name was changed to Timber NSW to reflect the broader interests in timber.

PURPOSE

Timber NSW promotes the profitable and environmentally sound utilisation of NSW forest resources. The Association seeks to **achieve for the industry that which an individual company in isolation cannot**, specifically by:

- Facilitating the ability of the industry to speak with one voice on issues affecting its viability and future
- Acquiring and disseminating relevant information to members to ensure current, widespread knowledge of developments and events
- Providing expert and informed advice to government and its agencies to assist in policy-making and resolution of conflict
- Lobbying politically on the industry's behalf
- Mediating between individual members and government and its various agencies
- Promoting the value of the timber industry within the community
- Assisting members in the development of new and profitable markets and the promotion of their products.
